PROJECTS

AI-Powered Security System with Object Detection

- Designed and developed a real-time object detection and facial recognition system using YOLO-World and Python for enhanced security and monitoring. Implemented automated WhatsApp alerts and AI-based voice control for seamless remote surveillance and user interaction

AI-Powered Food Detection and Calorie Estimator

- This project uses machine learning to identify different food items and estimate their calorie content. By analyzing images, the model classifies food types and retrieves nutritional information. It provides users with quick and accurate calorie estimations, making it a valuable tool for diet tracking and healthy eating.

AI-Powered Data Analyzer

- This project processes uploaded files and generates comprehensive statistical insights using AI. It automatically analyzes data, identifies key trends, and presents meaningful visual summaries., it helps users make data-driven decisions quickly without complex manual analysis.

ACHEIVMENTS

• PALS-ECU CTF HACKATHON - 17th Place

Secured 17th place in the finals of the prestigious PALS-ECU CTF Hackathon conducted in IIT-MADRAS

• NPTEL - TOP 5 TOPPER

Scored 90% in NPTEL, ranking among the top 5% toppers.
